SUMMARY

• I have five years' experience in developed mobile app cross-platform in the fields of sales, ordering, utilities, warehouse management, reporting, e-commerce, blockchain,... I also have one year of experience in programming backend & frontend website. I'm a good team player with high responsibility. I am very interested in all-in-one payments, especially blockchain technology. Looking forward to hone in the field of web and full-stack dev orientation in the future.

KNOWLEDGE

Google Firebase
Firebase Android development member
  • Android software development orgization
  • Application development for high-class restaurants real time firebase join the community Vlance
  • Participate in project development flutter find room
  • Flutter WebRTC live stream Video
  • CI/CD Github acction to deploy application on App Store and CH Play

  •

SKILLS

• App Developer (Android - Java, Flutter - Dart, RN - js,ts,..) & Fullstack Website (C# .Net, Angular, SQL).

• Analyse system's structure, write documentation, diagram related to system and application flow. (Use case, Sequence, ER, Activity diagram). Consulting and provide solutions to the problem.

• Great team player and manage team by following scrum model and working on tools (jira, trello, kanban).

• Git (git flow, gitlab, github), SVN. Review code.
• Research & read English documents

WORK EXPERIENCE

SOFTWARE ENGINEER & FLUTTER - REACT-NATIVE
MSB VIET NAM (09/2022 - PRESENT)
Responsibility Follow Agile method in Scrum team According to URD in order to build the UI/UX for app. Build some functions in app:
  • Card management (Card credit/debit issuing..)
  • Overdraft
  • Evoucher Cashback
  • Fingerprint authentication
  • Biometric login & payment
  • Build & deploy app on TestFlight
  • Review & merge code

MOBILE TEAM LEAD & FLUTTER DEV
GOLDEN OWL (11/2020 - 08/2022)
• Setup CI/CD for Flutter app. Build Flutter Core Project, Mobile Development & Delivery Process and Mobile App Feature Bank, training.
• Experience in automation testing: unit tests, widget tests and integration tests
• Worked with firebase Authentication, Cloud Firestore, Storage, Crashlytics, Analytics, Dynamic Links, Deeplink. Flamelink CMS to manage Firebase DB. Video call/chat with 3rd party Agora & firebase.
• Blockchain-dApps-NFT: call smart contract with web3dart, WebSocket, connect eth network, get balance,... connect app wallet (Metamask, Trust,..) with Walletconnect.
• Experience in publish the application on Apple Store (IOS) and Play Store (Android): more than 15 apps.
• Architect Flutter project using Bloc, Provider and Mobx, Clean Architecture, DI (getIt), Reactive programming (RxJava, RxDart).
• Embed flutter in android native app, plugin.
• Integrate payment module: Momo, VNPay, Mpos.
• Custom widget, canvas, animation,...
• Manage database using Firestore, Cloud Storage, Sqlite,..
• Worked with 3rd party such as Rxdart, Dio, Chart,...
• Worked with google API such as firebase, google drive, google fit, google maps...

ANDROID/ ReactNative DEV
DFM ENGINEERING (10/2017 - 10/2020)
• Android Native (Java) dev at Mobile Touch Company with outstanding products Posapp, PosApp Kiot, Posapp Report.
• Android JAVA - KOLIN: MVC, MMVM, rxjava2, retrofit2, multi-thread, restful api.
• Modules native java: Sevices GPS, xprinter, reader, card NFC, qr code and momo, otp, notification ...vv.
• Apply MVP pattern, JSON data, Restfull API, unit test, Push Notification GCM, FCM, Redux (RN), RoomDB, SQLite,..
• Integration: thermal printer, stamp printer module on Native Android(Lan, Bluetooth, USB printer) & IOS (Lan, Bluetooth printer).

PROJECTS

FLUTTER 2020-2021

MSB New Mobile

- **Position:** SOFTWARE ENGINEER
- **Project:** Banking Application
- **Technology:** Utilizing Flutter with the GetIt architecture
- **Features:**
  - Card Management (Credit/Debit Card Issuing..)
  - Expense Tracking
  - Evoucher Cashback
  - Fingerprint Authentication
  - Biometric Login & Payment

Snapfit

- **Position:** Mobile Developer and Team Leader
- **Project:** Physical Therapy App
- **Technology:** Using Provider and Bloc with Flutter
- **Features:**
  - Real-time 1-on-1 chat with image display through socket connection
  - Handling user information sharing via links
  - Recording and playback of exercise videos, including REP SET counting, then compressing and. sending the video to the server
  - Decompressing received Zip files from the API and converting them into video format
  - Implementing message search and scrolling to the located point in chat history

PP--- (DAPPS)

- **Position:** Dev
- **Project:** Application for users to bid/ask sell/transfer,.. NFTs, mint NFTs.
- **Technology:**
- **Features:**
  - Flutter, Flutter web, BloC-Provider, Clean architecture
  - Web3dart, call to smart contract, get balance,.. connect to Wallet (WalletConnect, Trust, Metamask).
  - Firebase Authen, Cloud Firestore, Storage, Crashlytics, Analytics, Dynamic Links. Use Flamelink CSM for firebase database.

KS PAYPONT

- **Position:** Dev
- **Project:** Utility applications automatic washing, chat support,..
- **Technology:** Flutter, Flutter web, BloC Providers, firebase deep linking, cloud firestore, Crashlytics, Analytics, api.

ALO SHIP 99

- **Position:** TEAM LEAD.
- **Project:** This is an application to book motorbike taxis, order, buy for yourself.
- **Features:**
  - Flutter, Google Maps api, BloC - Provider, Clean Architechture using push notification onesignal custom service extension java and switch.

VIETNAM'S SUPPLEMENTS

- **Position:** TEAM LEAD.
- **Project:** Health apps curated to create pharmacy locations and pick up prescription.
- **Technology:**
  - Flutter, BloC-Provider, Clean architecture,
  - Login with facebook, google, apple id, chat socket.
  - In-app purchases: Vn Pay.

GoPlay

- **Position:** Developer, Sub Team Leader
- **Project:** Application product for buying and selling games
- **Technology:**
  - Flutter, BloC-Provider, Deeplink, Play game, Photon SDK with social networking, application Flutter.

Trum Gop

- **Position:** Developer, Sub Team Leader
- **Project:** E-commerce application for buying and selling cars payment vnpay,in Vietnam
- **Technology:**
  - Flutter, BloC-Provider, Deeplink, Play Games, Photon SDK with social networks, Flutter app.

PROJECTS

ANDROID - IOS

WESOLO - TRAVEL

- **Position:** Dev
- **Client's country:** Ireland
- **Industry:** Tourism and Local
- **Project:** Travel and chat apps, support, ..
- **Technology:** Kotlin
Vendor, firebase federated, cloud
firestore, Crashlytics, Analytics, api.
Website: https://wesolo.com/
https://goldenowl.asia/portfolio/we-solo

EXPIWELL

- **Position:** Dev
- **Client's country:** West Lafayette, US.
- **Industry:** Education.
- **Project:** Outsource ExpiWell App.
- **Technology:** Java
- **Feature:**
  - Market researchers, polling companies,
and social scientists want your valuable
opinions and experiences.
  - Using our app, you can send in your
experiences and opinions. We have real
surveys that you can take.

SATECO ECAPT

- **Position:** Dev
- **Client's country:** France.
- **Industry:** Serving production.
- **Project:** Product E.CAPT application.
- **Technology:** Java
- **Feature:**
  - New system pressure E.CAPT connection.
  - The function of measuring deviation of
cement connect usb serial port to
get data from arduino device displayed
on the user interface including height
, battery of the device, deviation of cement.

REACT - NATIVE

SMARTBUS APP

- **Position:** Dev
- **Client's country:** Ireland
- **Industry:** Tourism and Local
- **Product:** Travel and chat apps, support, ..
- Project Outsource We solo:
- **Technology:** Kotlin
Vendor, firebase federated, cloud
firestore, Crashlytics, Analytics, api.
Website: https://wesolo.com/
https://goldenowl.asia/portfolio/we-solo

MSB

- Position: SOFTWARE ENGINEER
- Project: Banking Application
- Technology: Utilizing Flutter wive with
the React-Redux
- Features:
  - Card Management (Credit/Debit Card
Issuing..)
  - Expense Tracking
  - Evoucher Cashback
  - Fingerprint Authentication
  - Biometric Login & Payment

DELEGATE CONNECT

- **Position:** Dev
- **Client's country:** Melbourne, London and Norway.
- **Industry:** Provide end-to-end virtual
and hybrid conferencing
solutions to events globally.
- **Project:** OutSource DC application.
- **Technology:** React - Native
- Using react-native and redux-toolkit
apply createAsyncThunk and createEntityAdapter
handle api and redux persist,
I handle display menu depending on
return api, handle talks, video, question, resources.

NOTEJS - LARAVEL

- **Position** Analyst & developer
- **Project:** Landing page introducing the
group and
business group products and more
ford car sales landing page templates.
- Technology: HTML / CSS / JS,
Bootstrap,
Mailchimp, backend.
